III. OVERALL EVALUATION, QUESTIONS FOR DEFENSE, CLASSIFICATION SUGGESTION

Summarize thesis aspects that swayed your final evaluation.

Final thesis represents a comprehensive proposal including detailed analysis and thematic studies. The film school building is well designed and logically placed on the northern part of the site allowing direct access from the tram stop. Both the moderate language of the brick facades and the scale of the volumes give the site a pleasant feeling of the university campus. I am satisfied that the project meets the assigned program, the layouts of the building are logically resolved, in the basement only I see a conflict between irregular shape of the building and the demands of rational parking. The urban design should have been better developed, particularly southern part between the school and the river seems to be undefined.

My questions are:

- is the urban design considering the existing valuable trees on the site?

As a result of this and other previous commentaries, Sheetal was able to create a successful strategy between program, context and form.

I evaluate handed thesis with classification grade **B - very good**.
