Landscape architecture is a discipline covering theories, approaches, techniques and arts concerning analysis, changes and management of landscape. LAF will put its focus on the intersecting spheres of academic research and design practice in landscape architecture, discussing new opinions, theories and approaches to address environmental and ecological issues through landscape architecture; advocating new aesthetics and new culture which benefit the beauty of China and the world by introducing and promoting most recent practice of landscape architecture. It acts as a bridge connecting research and social needs, science and art, leading the development of the discipline. Our audience includes researchers and professional architects, faculties and students, policy makers in related fields and people who work on the environmental constructions in both urban and rural areas.
